

# Depron foam

## **UHU** -Por

---

**Document:** Technical Data Sheet

**Product:** UHU - por

---

Quick-setting special adhesive for bonding hard foam such as Depron or Styrofoam, also in combination with other materials.

The elastic adhesive film is colourless, non-ageing, and waterproof.

UHU Por is a quick-setting special adhesive for bonding extruded polystyrene, e.g. Depron or expanded polystyrene, e.g. Styrofoam®. It forms an elastic adhesive film which is highly resistant to age, colourless and waterproof. UHU Por can be bonded with materials such as; wood, paper, metal, ceramic, plaster, fabric and various plastics. Also for photos.

### **Use and Handling Instructions**

Apply adhesive to both parts and let dry. Once dry to the touch (after approx. 10 minutes) press together very firmly for a short time being careful not to damage the rigid foam film
